Dear Old Darwinian,

Welcome to the Darwin College November 2008 e-bulletin. Here we list news and alumni events from both Darwin and the wider University community. If you would like more details on anything included, please do not hesitate to phone or e-mail. It is always a great pleasure to talk to our alumni and help them where we can.

Darwin College Lecture Series

2009 is the bicentenary of Darwin's birth and the 150th Anniversary of the publication of 'On the Origin of the Species'. To mark this occasion the theme for the 24th Annual Darwin Lecture Series is 'Darwin'.

The Darwinian Newsletter

The next newsletter will be mailed in February. If you have any news you would like us to put in this issue please e-mail Sophia Smith by Monday 20th December.

Darwin Fellow to give Royal Institution Christmas Lectures

This year Darwin Fellow, Professor Chris Bishop, is to give the Royal Institution Christmas Lectures. These prestigious lectures have been enjoyed by children and adults alike since 1825, when Michael Faraday initiated them. Many world-famous scientists have given the lectures including Baroness Susan Greenfield, the current Director of the Royal Institution, David Attenborough and George Porter. Chris's lectures will be a 'fast paced Hi-tech trek through the fascinating world of computer science'. To find out more go to:

Fundraising for the Purchase of No. 4 Newnham Terrace

We are very excited about the potential purchase of N^o 4 Newnham Terrace. The College is approaching grant-making organisations to help fund the project, but we certainly need your help as well. **A letter has just been sent to you – please give it your attention.**

N^o 4 is the sole house left in the Terrace not in College ownership. Buying it would provide more student rooms right in the middle of the main College site. Owning the whole of the river frontage opens up other possibilities too – it will allow N^o 4's garden, currently walled off from and dividing College properties on either side, to be consolidated into the main gardens – this would allow our already wonderful gardens to become quite magnificent grounds.
